*Health Policy
Inc. Infection Control*

Health policy

This policy was adopted alongside associated procedures, including ; Health and Safety, Allergens, Food Preparation, medication policy

Aim

Our provision is a suitable, clean, and safe place for children to be cared for, where they can grow and learn. They meet all statutory requirements for promoting health and hygiene and fulfil the criteria for meeting the relevant Early Years Foundation Stage Safeguarding and Welfare requirements.

Objectives

We promote health through:

- ensuring emergency and first aid treatment is given where necessary
- ensuring that medicine necessary to maintain health is given correctly and in accordance with legal requirements
- identifying allergies and preventing contact with the allergenic substance
- identifying food ingredients that contain recognised allergens and displaying this information for parents
- promoting health through taking necessary steps to prevent the spread of infection and taking appropriate action when children are ill
- promoting healthy lifestyle choices through diet and exercise
- supporting parents right to choose complementary therapies
- recognising the benefits of baby and child massage, by parents or staff carrying out massage under conditions that maintain the personal safety of children
- pandemic flu planning or illness outbreak management as per DfE and World Health Organisation (WHO) guidance

Infection control

Good practice infection control is paramount in early years settings. Young children's immune systems are still developing, and they are therefore more susceptible to illness.

Prevention

- Minimise contact with individuals who are unwell by ensuring that those who have symptoms of an infectious illness do not attend settings and stay at home for the recommended exclusion time (see below UKHSA link).
- Always clean hands thoroughly, and more often than usual where there is an infection outbreak.
- Ensure good respiratory hygiene amongst children and staff by promoting 'catch it, bin it, kill it' approach.
- Where necessary, for instance, where there is an infection outbreak, wear appropriate PPE.

Response to an infection outbreak

- Manage confirmed cases of a contagious illness by following the guidance from the [UK Health Security Agency \(UKHSA\)](#)

Informing others

Early years providers have a duty to inform Ofsted **of any serious accidents, illnesses or injuries as follows:**

- anything that requires resuscitation
- admittance to hospital for more than 24 hours
- a broken bone or fracture
- dislocation of any major joint, such as the shoulder, knee, hip or elbow
- any loss of consciousness
- severe breathing difficulties, including asphyxia
- anything leading to hypothermia or heat-induced illness

In some circumstances this may include a confirmed case of a Notifiable Disease in their setting, if it meets the criteria defined by Ofsted above. Please note that it is not the responsibility of the setting to **diagnose** a notifiable disease. This can only be done by a clinician (GP or Doctor). If a child is displaying symptoms that indicate they may be suffering from a notifiable disease, parents must be advised to seek a medical diagnosis, which will then be 'notified' to the relevant body. Once a diagnosis is confirmed, **the setting may be contacted by the UKHSA, or may wish to contact them for further advice.**
